

## 1. Description

### 1.1. Project

|                 |                    |
|-----------------|--------------------|
| Project Name    | bla                |
| Board Name      | custom             |
| Generated with: | STM32CubeMX 4.27.0 |
| Date            | 11/28/2022         |

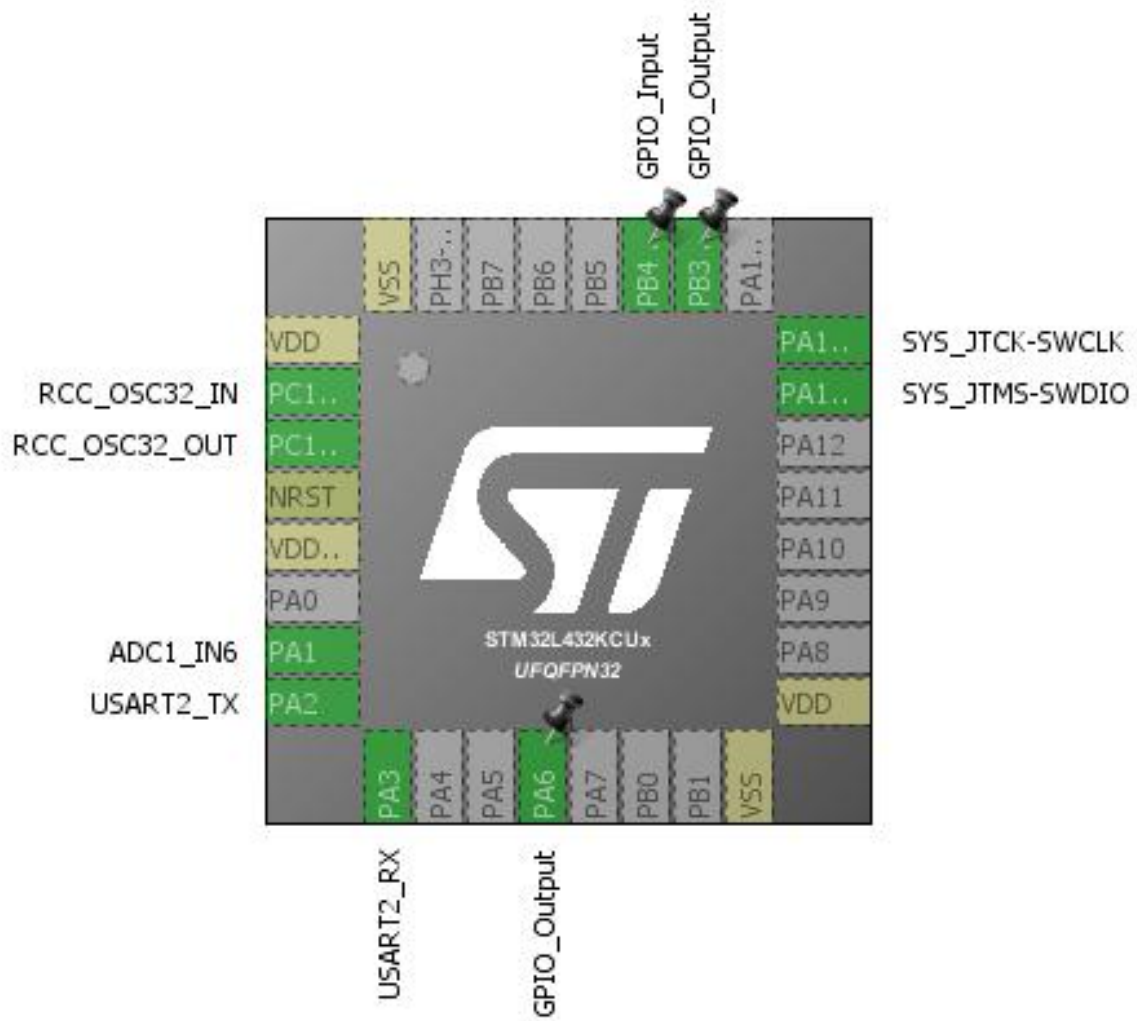

### 1.2. MCU

|                |               |
|----------------|---------------|
| MCU Series     | STM32L4       |
| MCU Line       | STM32L4x2     |
| MCU name       | STM32L432KCUx |
| MCU Package    | UFQFPN32      |
| MCU Pin number | 32            |

### 1.3. Caution

The report was generated although the configuration was in a modified state. It may be not accurate

## 2. Pinout Configuration

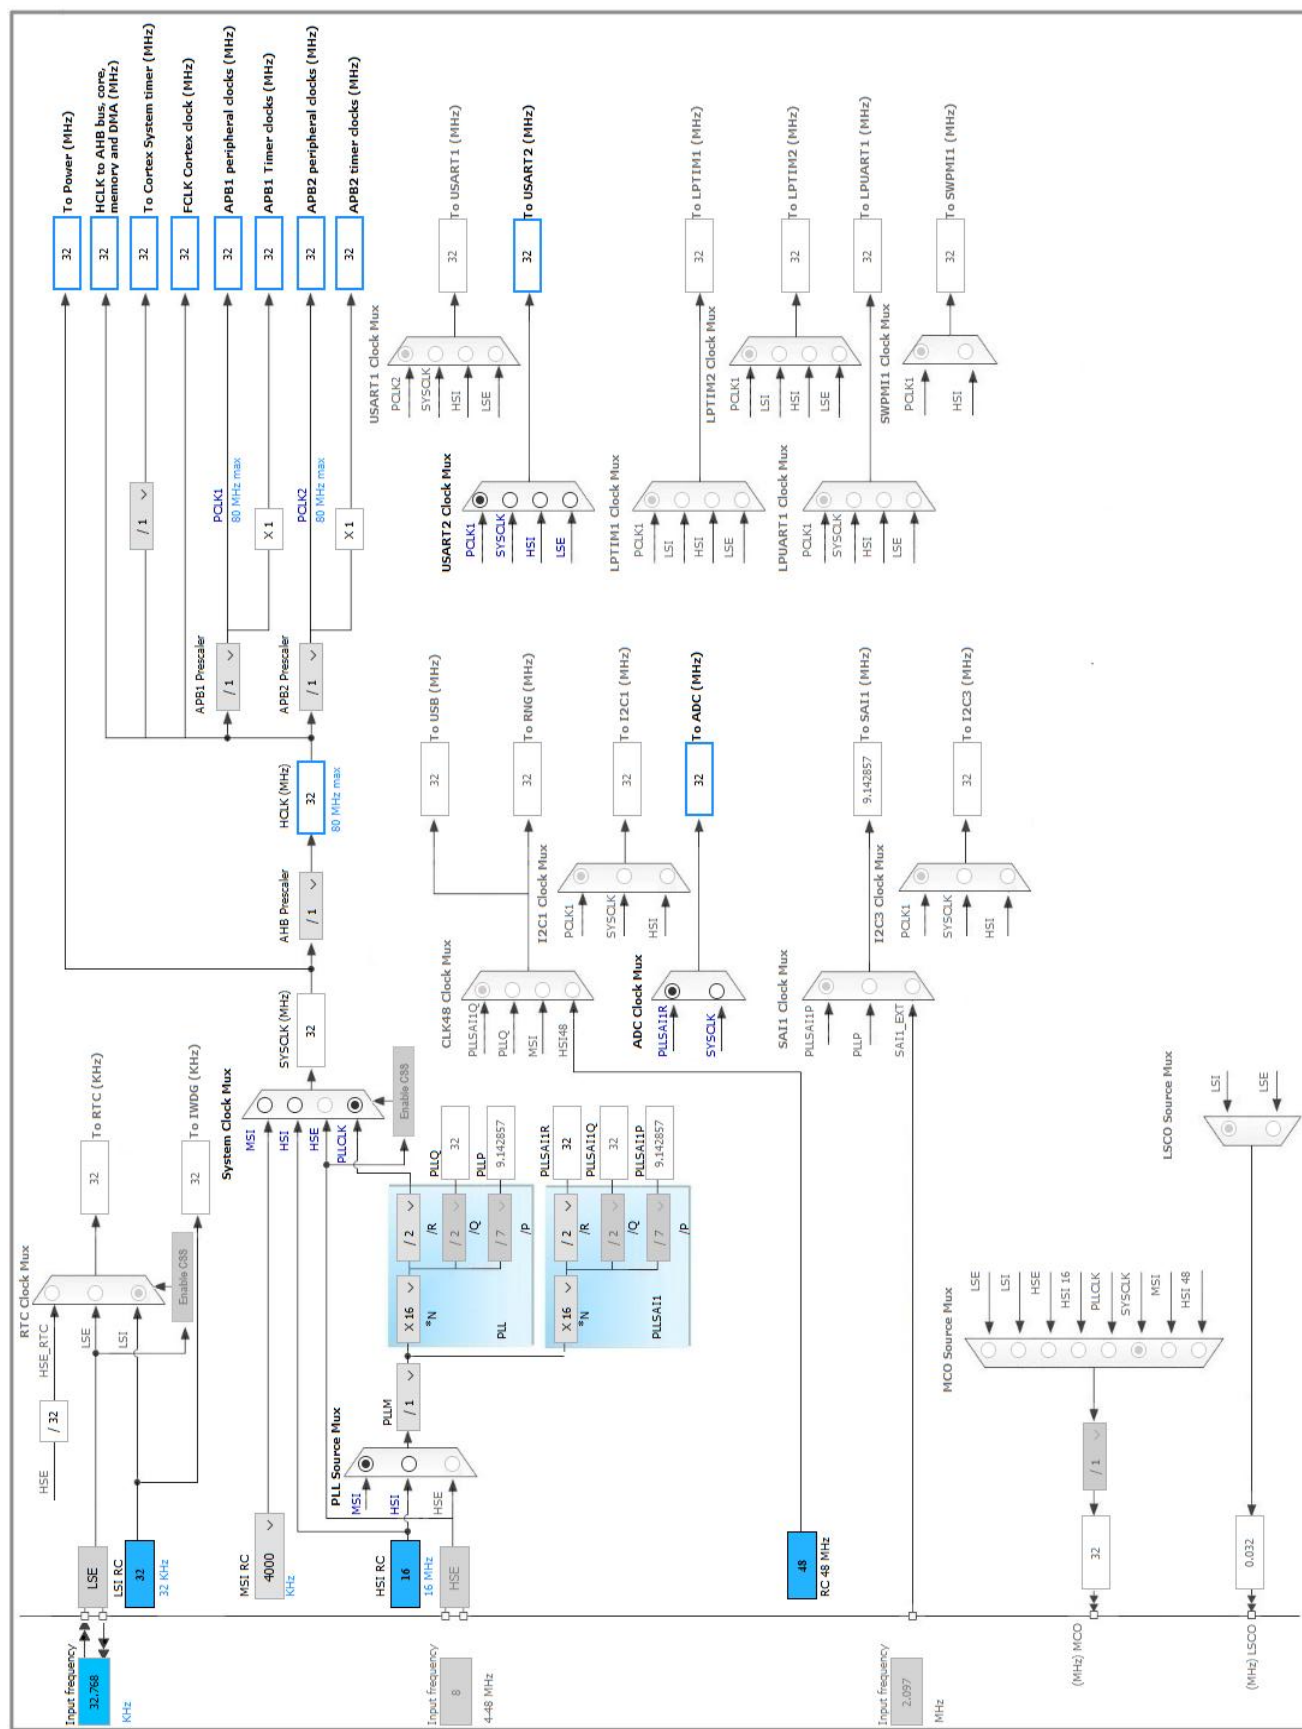

### 3. Pins Configuration

| Pin Number<br>UFQFPN32 | Pin Name<br>(function after<br>reset) | Pin Type | Alternate<br>Function(s) | Label |
|------------------------|---------------------------------------|----------|--------------------------|-------|
| 1                      | VDD                                   | Power    |                          |       |
| 2                      | PC14-OSC32_IN (PC14)                  | I/O      | RCC_OSC32_IN             |       |
| 3                      | PC15-OSC32_OUT (PC15)                 | I/O      | RCC_OSC32_OUT            |       |
| 4                      | NRST                                  | Reset    |                          |       |
| 5                      | VDDA/VREF+                            | Power    |                          |       |
| 7                      | PA1                                   | I/O      | ADC1_IN6                 |       |
| 8                      | PA2                                   | I/O      | USART2_TX                |       |
| 9                      | PA3                                   | I/O      | USART2_RX                |       |
| 12                     | PA6 *                                 | I/O      | GPIO_Output              |       |
| 16                     | VSS                                   | Power    |                          |       |
| 17                     | VDD                                   | Power    |                          |       |
| 23                     | PA13 (JTMS-SWDIO)                     | I/O      | SYS_JTMS-SWDIO           |       |
| 24                     | PA14 (JTCK-SWCLK)                     | I/O      | SYS_JTCK-SWCLK           |       |
| 26                     | PB3 (JTDO-TRACESWO) *                 | I/O      | GPIO_Output              |       |
| 27                     | PB4 (NJTRST) *                        | I/O      | GPIO_Input               |       |
| 32                     | VSS                                   | Power    |                          |       |

\* The pin is affected with an I/O function

#### 4. Clock Tree Configuration

## 5. IPs and Middleware Configuration

### 5.1. ADC1

#### IN6: IN6 Single-ended

##### 5.1.1. Parameter Settings:

###### ADC\_Settings:

|                               |                                      |
|-------------------------------|--------------------------------------|
| Clock Prescaler               | Asynchronous clock mode divided by 1 |
| Resolution                    | ADC 12-bit resolution                |
| Data Alignment                | Right alignment                      |
| Scan Conversion Mode          | Disabled                             |
| Continuous Conversion Mode    | Disabled                             |
| Discontinuous Conversion Mode | Disabled                             |
| DMA Continuous Requests       | Disabled                             |
| End Of Conversion Selection   | End of single conversion             |
| Overrun behaviour             | Overrun data preserved               |
| Low Power Auto Wait           | Disabled                             |

###### ADC\_Regular\_ConversionMode:

|                                    |   |
|------------------------------------|---|
| Enable Regular Conversions         | Enable                                  |
| Enable Regular Oversampling        | Disable                                 |
| Number Of Conversion               | 1                                       |
| External Trigger Conversion Source | Regular Conversion launched by software |
| External Trigger Conversion Edge   | None                                    |
| Rank                               | 1                                       |
| Channel                            | Channel 6                               |
| Sampling Time                      | 2.5 Cycles                              |
| Offset Number                      | No offset                               |

###### ADC\_Injected\_ConversionMode:

|                             |         |
|-----------------------------|---------|
| Enable Injected Conversions | Disable |
|-----------------------------|---------|

###### Analog Watchdog 1:

|                              |       |
|------------------------------|-------|
| Enable Analog WatchDog1 Mode | false |
|------------------------------|-------|

###### Analog Watchdog 2:

|                              |       |
|------------------------------|-------|
| Enable Analog WatchDog2 Mode | false |
|------------------------------|-------|

###### Analog Watchdog 3:

|                              |       |
|------------------------------|-------|
| Enable Analog WatchDog3 Mode | false |
|------------------------------|-------|

### 5.2. RCC

## Low Speed Clock (LSE) : Crystal/Ceramic Resonator

### 5.2.1. Parameter Settings:

#### System Parameters:

|                   |                    |
|-------------------|--------------------|
| VDD voltage (V)   | 3.3                |
| Instruction Cache | Enabled            |
| Prefetch Buffer   | Disabled           |
| Data Cache        | Enabled            |
| Flash Latency(WS) | 1 WS (2 CPU cycle) |

#### RCC Parameters:

|                                |                                     |
|--------------------------------|-------------------------------------|
| HSI Calibration Value          | 16                                  |
| MSI Calibration Value          | 0                                   |
| MSI Auto Calibration           | Enabled                             |
| HSE Startup Timeout Value (ms) | 100                                 |
| LSE Startup Timeout Value (ms) | 5000                                |
| LSE Drive Capability           | LSE oscillator low drive capability |

#### Power Parameters:

|                               |                                 |
|-------------------------------|---------------------------------|
| Power Regulator Voltage Scale | Power Regulator Voltage Scale 1 |
|-------------------------------|---------------------------------|

## 5.3. SYS

Debug: Serial Wire

Timebase Source: SysTick

## 5.4. USART2

Mode: Asynchronous

### 5.4.1. Parameter Settings:

#### Basic Parameters:

|             |                           |
|-------------|---------------------------|
| Baud Rate   | 115200                    |
| Word Length | 8 Bits (including Parity) |
| Parity      | None                      |
| Stop Bits   | 1                         |

#### Advanced Parameters:

|                |                      |
|----------------|----------------------|
| Data Direction | Receive and Transmit |
| Over Sampling  | 16 Samples           |
| Single Sample  | Disable              |

#### Advanced Features:

|               |         |
|---------------|---------|
| Auto Baudrate | Disable |
|---------------|---------|

|                               |         |
|-------------------------------|---------|
| TX Pin Active Level Inversion | Disable |
| RX Pin Active Level Inversion | Disable |
| Data Inversion                | Disable |
| TX and RX Pins Swapping       | Disable |
| Overrun                       | Enable  |
| DMA on RX Error               | Enable  |
| MSB First                     | Disable |

**\* User modified value**

## 6. System Configuration

### 6.1. GPIO configuration

| IP     | Pin                   | Signal         | GPIO mode                      | GPIO pull/up pull down      | Max Speed   | User Label |
|--------|-----------------------|----------------|--------------------------------|-----------------------------|-------------|------------|
| ADC1   | PA1                   | ADC1_IN6       | Analog mode for ADC conversion | No pull-up and no pull-down | n/a         |            |
| RCC    | PC14-OSC32_IN (PC14)  | RCC_OSC32_IN   | n/a                            | n/a                         | n/a         |            |
|        | PC15-OSC32_OUT (PC15) | RCC_OSC32_OUT  | n/a                            | n/a                         | n/a         |            |
| SYS    | PA13 (JTMS-SWDIO)     | SYS_JTMS-SWDIO | n/a                            | n/a                         | n/a         |            |
|        | PA14 (JTCK-SWCLK)     | SYS_JTCK-SWCLK | n/a                            | n/a                         | n/a         |            |
| USART2 | PA2                   | USART2_TX      | Alternate Function Push Pull   | No pull-up and no pull-down | Very High * |            |
|        | PA3                   | USART2_RX      | Alternate Function Push Pull   | No pull-up and no pull-down | Very High * |            |
| GPIO   | PA6                   | GPIO_Output    | Output Push Pull               | No pull-up and no pull-down | Low         |            |
|        | PB3 (JTDO-TRACESWO)   | GPIO_Output    | Output Push Pull               | No pull-up and no pull-down | Low         |            |
|        | PB4 (NJTRST)          | GPIO_Input     | Input mode                     | No pull-up and no pull-down | n/a         |            |

### 6.2. DMA configuration

nothing configured in DMA service

### 6.3. NVIC configuration

| Interrupt Table  | Enable | Preenmption Priority | SubPriority |
|--|--------|----------------------|-------------|
| Non maskable interrupt   | true   | 0                    | 0           |
| Hard fault interrupt   | true   | 0                    | 0           |
| Memory management fault  | true   | 0                    | 0           |
| Prefetch fault, memory access fault                                  | true   | 0                    | 0           |
| Undefined instruction or illegal state                               | true   | 0                    | 0           |
| System service call via SWI instruction                              | true   | 0                    | 0           |
| Debug monitor  | true   | 0                    | 0           |
| Pendable request for system service                                  | true   | 0                    | 0           |
| System tick timer  | true   | 0                    | 0           |
| PVD/PVM1/PVM2/PVM3/PVM4 interrupts through EXTI lines 16/35/36/37/38 | unused |                      |             |
| Flash global interrupt   | unused |                      |             |
| RCC global interrupt   | unused |                      |             |

## 7. Power Consumption Calculator report

### 7.1. Microcontroller Selection

|           |               |
|-----------|---------------|
| Series    | STM32L4       |
| Line      | STM32L4x2     |
| MCU       | STM32L432KCUx |
| Datasheet | 028798_Rev2   |

### 7.2. Parameter Selection

|             |      |
|-------------|------|
| Temperature | 25   |
| Vdd         | null |

## 8. Software Project

### 8.1. Project Settings

| Name                              | Value                          |
|-----------------------------------|--------------------------------|
| Project Name                      | bla                            |
| Project Folder                    | C:\Users\akramaziz\Desktop\bla |
| Toolchain / IDE                   | MDK-ARM V5                     |
| Firmware Package Name and Version | STM32Cube FW_L4 V1.13.0        |

### 8.2. Code Generation Settings

| Name  | Value                                 |
|---|---------------------------------------|
| STM32Cube Firmware Library Package                              | Copy only the necessary library files |
| Generate peripheral initialization as a pair of '.c/.h' files   | No                                    |
| Backup previously generated files when re-generating            | No                                    |
| Delete previously generated files when not re-generated         | Yes                                   |
| Set all free pins as analog (to optimize the power consumption) | No                                    |

## ***9. Software Pack Report***
